

Our systems. Always two steps ahead!

Air Creative™

- **The 3-stage system**

First the dust filter cleans the air, and then any negative odours are neutralised in step two. In the third stage, the air is carefully enriched with the messenger substances. By way of comparison: You surely don't apply perfume after exercising, without first taking a shower, do you?

Our advice: "First clean, then neutralise and then release messengers!" All that in one and the same device.

- **Endless possibilities make the difference**

Whether in the form of free-standing systems, wall fixtures or ceiling mounting, Air Creative has the right solution for every need. Easy installation and excellent service guarantee that the devices will become your loyal companions for daily use.

Low-maintenance technology ensures smooth operation. A concept with which you will soon become familiar.

Special features

Premium Line:

- **Individually adjustable messenger substances**
- **Improved performance**
- **Special design**
- **Messenger substance and Aiomex® are separated**

Technical description / Floor standing system

Appliance type	Premium 2011
Special features	Floor standing device
Scenting capacity	max. 500 m ³
Height	830 mm
Width x depth or diameter	235 mm
Weight	5.3 kg
Volume 4.5 Volt (1 meter)	34 dB
Volume 12 Volt (1 meter)	42.5 dB
Electrical connection	100-240 VAC / 0.25 A
Maximum power	4.3 W
Artide number	110102
Neutralisation	1
Messenger substances	1
airomex [®] -messenger substance mixture	—
airomex [®] -ready-to-use mixture	—

- **Classic Line**

Our classic system purifies the air and eliminates unpleasant odours. The room climate is then subtly enriched with gentle messenger substances. The intensity cannot be changed.

You would like a tried and tested system that does not require regulating the intensity on your own? With the classic line you are in good hands.

Special features

Classic Line:

- Economically priced system
- Long service intervals
- High flexibility
